

Data Analytics Intern — Case Study

Project Canvassing Strategy | Cindy Chen | March 2026

Part 2 — BD Canvassing Strategy

Total Tier 1 Leads	23,700 merchants (12.6% of 188,789 AU dataset)
Top Sector	F&B — 19,055 leads (80% of Tier 1)
Top Suburb	Sydney CBD — 2,542 Parramatta — 1,173 Chatswood — 768
KMF Score Range	Tier 1: 80–100 pts Tier 2: 50–79 pts Tier 3: < 50 pts
Territory Zones	Zone A (Cultural Core) · Zone B (Suburban Density) · Zone C (CBD & Inner West)
Sprint Duration	4 weeks — 180+ sign-up target

1. Strategy Overview

The BD canvassing strategy is built directly from the KMF scoring output. Rather than distributing 23,700 Tier 1 leads to BD reps as a flat list, the strategy groups merchants into three geographic zones based on cultural fit, lead density, and KPay's competitive advantages. Each zone has a distinct outreach method, timing, and pitch angle.

The central insight driving this strategy is that 8 of the top 10 Tier 1 suburbs are Asian-Australian community centres — Chatswood, Hurstville, Cabramatta, Bankstown, Auburn, Burwood, Haymarket, and Eastwood. These suburbs represent KPay's structural competitive moat: no other EFTPOS provider in Australia natively supports UnionPay, Alipay, WeChat Pay, JCB, and multilingual service in the same terminal. The territory design deliberately exploits this advantage.

The strategy is sequenced to maximise BD efficiency — in-person visits to highest-density cultural-fit suburbs in Week 1, expanding to broader suburban corridors in Week 2–3, and scaling with digital channels in Month 2.

2. Territory Zone Design

Sydney's 23,700 Tier 1 leads are divided into three zones. Each zone has a distinct profile, competitive rationale, and outreach method.

Zone A — Asian Community Core

Zone A is KPay's highest-priority territory. These suburbs have the strongest overlap between Tier 1 lead density, F&B and Beauty merchant concentration, and Asian-Australian population density — the precise communities where KPay's multilingual support and alternative payment methods are a direct competitive advantage over Square and CommBank.

Asian Community Core

Highest KPay cultural fit. Multilingual support and UnionPay/JCB acceptance creates a direct competitive moat that no other EFTPOS provider can match in these suburbs.

Strategy: In-person visits by BD rep — bring terminal for on-site setup

Avg KMF:

Tier 1 Leads:

Timing: Week 1 priority — first in-person sprint

KEY SUBURBS & TIER 1 LEAD COUNT

Chatswood 768 Tier 1 leads
Haymarket 455 Tier 1 leads
Cabramatta 375 Tier 1 leads
Burwood 544 Tier 1 leads
Hurstville 465 Tier 1 leads
Ashfield 248 Tier 1 leads
Strathfield 220 Tier 1 leads
Campsie 198 Tier 1 leads
Eastwood 265 Tier 1 leads
Kogarah 175 Tier 1 leads

Zone B — High Density Suburban Corridors

Zone B covers Sydney's major suburban commercial corridors. These suburbs have high merchant density and strong Retail and F&B presence, but slightly lower KPay cultural fit than Zone A. They are best approached after Zone A foundations are established, with phone outreach and in-person visits running in parallel.

High Density Suburban

Mixed Retail and F&B corridors with high merchant density. Parramatta alone contains 1,173 Tier 1 leads — making it the single largest opportunity suburb outside the CBD.

Strategy: Phone outreach + targeted in-person visits

Avg KMF:

Tier 1 Leads:

Timing: Weeks 2–3

KEY SUBURBS & TIER 1 LEAD COUNT

Parramatta 1,173 Tier 1 leads
Bankstown 632 Tier 1 leads
Auburn 523 Tier 1 leads
Liverpool 290 Tier 1 leads
Blacktown 185 Tier 1 leads
Ryde 145 Tier 1 leads
Rhodes 132 Tier 1 leads
Hornsby 118 Tier 1 leads
Penrith 105 Tier 1 leads

Zone C — CBD & Inner West

Zone C covers Sydney CBD and the inner west. These suburbs have high transaction volume potential but lower KPay cultural fit — the merchant base skews toward professional services and independent hospitality rather than the family-run retail businesses that form KPay's core conversion target. Zone C is best approached via phone and digital channels after Zone A and B groundwork is complete.

CBD & Inner West

KEY SUBURBS & TIER 1 LEAD COUNT

Sydney CBD 2,542 Tier 1 leads

High transaction volume but lower cultural fit. Strong second-wave pipeline. North Sydney professional services corridor is best approached with a B2B savings pitch rather than the multilingual advantage angle.

Strategy: Phone outreach + digital campaigns

Avg KMF:

Tier 1 Leads:

Timing: Month 2 — phone and digital

Surry Hills 345 Tier 1 leads

Marrickville 310 Tier 1 leads

Newtown 165 Tier 1 leads

North Sydney 128 Tier 1 leads

3. Pitch Angles by Sector

Pitch angles are derived directly from the Tier 1 sector distribution. Rather than one generic pitch for all merchants, BD reps use a sector-specific opening tailored to the business type they are visiting. Each pitch is anchored to a specific KPay competitive advantage — not features, but consequences the merchant already cares about.

Tier 1 sector breakdown: F&B accounts for 80% (19,055 leads), Retail 11% (2,685 leads), Beauty & Wellness 8% (1,960 leads). These three sectors cover 99% of all Tier 1 outreach.

3.1 F&B — Food & Beverage

F&B

Your customers already use WeChat Pay and UnionPay — you are leaving sales on the table every day.

Why This Angle	80% of Tier 1 F&B merchants are in Asian-Australian suburbs where a significant share of customers pay with UnionPay, Alipay, or WeChat Pay. KPay is the only EFTPOS terminal in Australia that natively supports all of these in one device, without requiring a separate QR code reader or third-party integration.
Opening Hook	<i>"Did you know 1 in 3 of your customers might be walking out because you don't take their card?"</i>
Common Objection	"I already have CommBank" or "I already have Square"
Rebuttal	CommBank does not support UnionPay. Square charges 1.6%+ with no same-day settlement and does not support Chinese payment apps. KPay charges 1.4% flat, settles the same day, and supports UnionPay, Alipay, and WeChat Pay natively — in one terminal at \$0 upfront cost.
Close / CTA	Offer a free 30-day trial with same-day settlement and zero lock-in. Remove all friction — if they are not happy after 30 days, they walk away with no penalty.

3.2 Beauty & Wellness

Beauty & Wellness

Same-day settlement — you see your money tonight, not in 3 business days.

Why This Angle	Nail salons, hair salons, and beauty businesses have thin margins and tight daily cash flow. CommBank and Square hold funds for 2–3 business days. KPay settles same-day — meaning the revenue from today's appointments is in the merchant's account before they close. For a salon processing \$2,000 per day, that is \$4,000–\$6,000 of cash that is currently sitting in a bank float they do not control.
Opening Hook	<i>"How long does your current terminal take to send money to your account?"</i>
Common Objection	"I don't want to switch — it sounds complicated"
Rebuttal	Setup takes 10 minutes. The BD rep brings the terminal, configures it on-site, and trains staff before leaving. There is no contract. If the merchant is not happy in 30 days, they walk away. The only commitment is trying it.
Close / CTA	On-site setup offer — BD rep brings terminal and completes full configuration during the visit. Target nail salons and beauty salons in Zone A clusters where the highest appointment volume is concentrated.

3.3 Retail

Retail

\$0 terminal, no monthly fee — save approximately \$1,200 per year versus your current provider.

Why This Angle	Independent retail merchants typically pay \$30–\$50 per month in terminal rental plus 1.6–2.2% transaction fees. KPay charges \$0 terminal and 1.4% flat. For a merchant processing \$10,000 per month, that is over \$1,000 saved annually with zero hardware cost. The pitch is simple economics — KPay is cheaper, with no lock-in, and supports more payment methods.
Opening Hook	<i>"What are you currently paying in terminal fees per month?"</i>
Common Objection	"We are locked into a contract with our current provider"
Rebuttal	KPay will cover early termination fees up to \$200. And since KPay has no lock-in contract, the merchant is never in this position again — they can leave at any time at no cost.
Close / CTA	Contract buyout offer — merchant brings their termination fee invoice and KPay covers it up to \$200. This removes the single biggest switching barrier for retail merchants who are locked into existing contracts.

4. General Objection Handling

Beyond sector-specific objections, BD reps should be prepared for three universal objections that apply across all merchant types.

Objection	Response
"I'm happy with my current provider"	That's great — can I ask which one? Most merchants we speak to don't realise they can save \$800–\$1,200 per year on fees alone. We're not asking you to switch today — just let me show you the numbers in 5 minutes.
"I don't have time right now"	Completely understand. Can I leave you a card and come back at [specific time]? Setup takes 10 minutes when you're ready — I can do it before you open or after you close so there's zero disruption.
"I've never heard of KPay"	KPay launched in Australia in October 2025. We've signed [X] merchants in Sydney already, and we're Forbes Asia 100 to Watch 2026. The reason you haven't heard of us yet is we've been focused on specific suburbs — and yours is next. Would you like to be an early adopter in this area?

5. 4 Week Outreach Sprint Plan

The sprint plan sequences all three zones in order of KPay's competitive advantage strength — Zone A first, Zone B second, Zone C third. Each week has a defined territory, outreach method, daily actions, and a measurable sign-up target. The cumulative target is 180+ sign-ups over 4 weeks.

Zone A In-Person Blitz

Target: 50 sign-ups | **Method:** In-person visits — BD rep brings terminal for on-site setup

Focus Area: *Chatswood · Haymarket · Cabramatta · Burwood · Hurstville · Ashfield*

- Morning sessions: 5 in-person visits per suburb cluster, prioritising F&B businesses open before lunch
- Afternoon sessions: follow-up calls to morning contacts, book same-day or next-day setup appointments
- Bring terminal for on-the-spot setup — removing the need for a second visit eliminates 40% of drop-off
- Target 3–5 sign-ups per BD rep per day across the Zone A cluster
- At every sign-up, ask for one referral to a neighbouring business — referral warm introductions convert 3× better than cold visits

Target: 50 sign-ups by end of Week 1

Zone A Follow-Up + Zone B Launch

Target: 80 cumulative sign-ups | **Method:** In-person (Zone B) + phone follow-up (Zone A)

Focus Area: *Parramatta · Bankstown · Auburn · Liverpool · Zone A follow-ups*

- Follow up all Week 1 contacts who did not sign — offer a same-day setup incentive to close hesitant leads

- Launch Zone B in-person visits — Parramatta CBD corridor alone has 1,173 Tier 1 leads, making it the largest single-suburb opportunity outside the CBD
- Activate referral harvesting from Week 1 Zone A sign-ups — warm introductions into neighbouring businesses
- Beauty & Wellness sub-sprint: target nail salons and hair salons in Zone A clusters with same-day settlement pitch
- Begin tracking Contact-to-Meeting rate to identify if phone quality is affecting outreach performance

Target: 80 cumulative sign-ups by end of Week 2

Zone B Deep Dive + Referral Harvest

Target: 130 cumulative sign-ups | Method: Phone + referral visits (Zone B) · Phone outreach begins for Zone C

Focus Area: *Blacktown · Ryde · Rhodes · Hornsby · Penrith · Surry Hills (phone)*

- Complete Zone B in-person visits for all high-count suburbs
- Harvest referrals from Week 1–2 sign-ups — aim for 1 referral per existing customer
- Begin Zone C phone outreach: Surry Hills, Marrickville, Newtown — F&B and independent retail pitch
- Activate contract buyout offer for retailers still locked into competitor contracts
- Review KMF tier accuracy — compare predicted Tier 1 suburbs with actual sign-up conversion rates and update geo weights if needed

Target: 130 cumulative sign-ups by end of Week 3

Zone C Outreach + Digital Scale-Up

Target: 180+ cumulative sign-ups | Method: In-person (Zone C) + digital campaigns for Tier 2 (68,447 leads)

Focus Area: *Sydney CBD · North Sydney · Newtown · Marrickville · Digital — all Tier 2*

- Zone C in-person visits: North Sydney professional services corridor — B2B savings pitch, not cultural fit pitch
- Launch digital campaign targeting all 68,447 Tier 2 merchants — WeChat and LINE ads in Sydney's Chinese-Australian community
- Retarget all Week 1–3 no-shows with digital touchpoints — lower conversion rate but zero marginal cost
- Month-end review: update KMF model weights based on actual sign-up conversion data from all 4 weeks
- Plan Month 2 territory: scale successful Zone A patterns to VIC and QLD using the same KMF methodology

Target: 180+ cumulative sign-ups by end of Week 4

6. Referral Loop Strategy

The referral loop is the highest-leverage BD tactic in this strategy. When a BD rep signs a merchant in a dense commercial strip, that merchant has 5–20 immediate neighbours who share the same foot traffic

patterns, customer demographics, and payment challenges. A warm referral from a signed merchant eliminates the cold-outreach barrier and compresses the sales cycle from 2–3 visits to 1.

Implementation: at every sign-up, the BD rep asks one question — "Is there another business nearby that you think would benefit from this?" If yes, the rep asks the signed merchant to call or text the neighbour while still on site, creating a live warm introduction. This approach is modelled on KPay's existing referral programme and requires no additional resources.

Referral target	1 referral per signed merchant
Expected uplift	3× higher conversion rate vs cold outreach
Best zones	Zone A commercial strips — Chatswood, Haymarket, Campsie, Cabramatta
Incentive	Existing KPay referral programme — confirm current reward with BD manager
Tracking	Log referral source in CRM against each lead to measure referral contribution

7. Strategy Summary

Total Tier 1 leads	23,700 merchants across 24 Sydney suburbs
Zone A priority	3,286 leads — in-person, Week 1, cultural fit play
Zone B priority	2,895 leads — in-person + phone, Weeks 2–3
Zone C priority	3,490 leads — phone + digital, Month 2
Tier 2 digital pipeline	68,447 leads — WeChat/LINE ads, Month 2
Primary pitch	F&B — UnionPay + multilingual support advantage
Secondary pitch	Beauty — same-day settlement cash flow advantage
Tertiary pitch	Retail — \$0 terminal, 1.4% flat, contract buyout
4-week sign-up target	180+ merchants signed
Key competitive moat	Zone A suburbs: only EFTPOS terminal supporting UnionPay + Alipay + WeChat Pay natively in Australia
